ABSTRACT

History is the series of colourful events. They say history is written as per direction and dictation of the sweet will of the dictator. Thus it is fabricated or manufactured. As such, in history the names are real but facts either are fabricated or manufactured or both simultaneously. It is the store house of chronological events pregnant with immense colour and corruption as well.

KEY WORDS: Chronology, historical events, order, sequence, dates and time, occurrence, table

INTRODUCTION:

Creative writing is based more on manifestation rather than on expression. It does not inform, rather it reveals. So it bears no reference. The best creative writing is critical, and the best critical writing is creative. This article is an outcome of thinking about creative writing meant for a general readership. As such, I have adopted a free style methodology so that everyone can enjoy the pleasure of reading. As you might know, Francis Bacon (1561-1626), the immortal essayist, wrote many essays namely 'Of Love', 'Of Friendship', 'Of Ambition', 'Of Studies', and so on. The multiple-minded genius correctly pointed out that all the words of the dictionary can be used as themes for essays. But little has been done since his death to continue or finish his monumental task. Bacon's unique individual style of presentation ignited my imagination and encouraged me to write creative essays as a method of relieving a wide range of emotions through catharsis.

ARTICLE:

Chronology is the study of historical records to establish the dates of past events. It is the science of measuring time and of dating events in proper order. It is an order of events from earliest to latest, or a particular statement of this order. It is the science of measuring and arranging time in fixed periods and ascertaining the dates and historical order of past events. It is the science of fixing the dates of historical events and epochs. It is an arrangement or list of events in the order in which they occurred. It is a reference work in the field of history organised according to the dates of past events. It is a list of table of dates in their proper sequence. It is the arrangement of events, dates, etc. in the order of their occurrence. It is a table or document displaying this. It is the science of computing dates and time. It is scheme of time. It is order of time.

Chronicle is continuous register of events in order of time. It is a historical record or register of facts or events arranged in the order in which they happened. It is a bare record of events in order of time. It

is a chronological record of events in the order of their occurrence. It is a narrative. It is a history. It is a story, a full account. It is newspaper name. It is the name of two of the Old Testament books. It is the name of a newspaper e.g. The Daily Chronicle.

A chronology of Mozart's life is very important to the scholars. The student consults the chronicles of the period e.g. Anglo Saxon Chronicle. Chronicling the events of a war is a matter of thorough research. Gibbon chronicled the downfall of the Roman Empire.

Chronological is arranged or regarded in the order in which they occurred e.g. a chronological list of Shakespeare's plays i.e. in the order in which they were written. It is arranged with earlier things or events preceding later ones: chronological order. It is pertaining to or in accordance with chronology. It is especially containing or relating to an account of events in the order of their occurrence. Chronological age is age in years, etc. Opposite of it is to mental age. Intelligent Quotient (IQ) is a ratio of both the ages.

Chronicles is the Bible either of two books of history of the Old Testament, I Chronicles or II Chronicles, recording the history of Israel and Judah from the Creation until the return from Exile (536 BC).

Chronologist is a person skilled in chronology. He is also called chronologer.

Chrono-biology is the study of biological activity in relation to time, as in various cycles and rhythms. It is the science of biological rhythms, especially where the properties of the rhythms are measured.

Chronicler is a writer of a chronicle. He is a person who writes accounts of important or historical events. Example: a chronicler of 18th century American life.

Chronogram is an inscription from which a date is got by adding the values of such letters as are Roman numerals.

Chronograph is an instrument recording time with extreme accuracy. It is stop-watch.

Childhood, teenage, youth, middle age and old age are different facets of life. These inevitable stages of life care none but appear chronologically and silently. Sometimes one phase gallops and reaches the next stage. For example: much labour reduces face value of youth thereby decreases glamour and the person seems to be aged enough. Sometimes a person gallops all the stages and dies thereby reaches the last stage. Again in an unfortunate case a new born babe and sometimes even an unborn babe dies prematurely ignoring all chronological stages. Arrival i.e. birth and departure i.e. death and the stages in between if appear chronologically then there is no problem. It pains when death like event appears prematurely ignoring natural chronology.

Time cares none. Eternity obeys none. Here sequences are very important. In history if any period is missed there is the scope of research. In the examination jumping of steps is both good and bad. In case of literature all the points should be discussed to prove the knowledge of the examinee. In case of mathematics an expert student may omit steps and thereby reaches the conclusion within stipulated period of time. In argument omission is a good tact. A good orator knows what to tell. A great orator knows what not to tell.

Past, present and future are three chronological stages. The events among these three stages appear sequentially. Any missing link of chronicles is the concern of the scholars for their research. In case of murder or any crime the suspected culprit has to narrate the detail chronicle of his movement for a particular period of time. A student must read attentively. Then he will earn. After that he will marry. Then he will retire in course of time. These are the chronological events a man should follow. Now if a student plays instead of reading then he will fail in the examination. Thus he deprives himself from formal education that paves for future success. Then he neither gets a job nor can he start a business for lacking in talents. Here lies the importance of chronology of human life. If any unfortunate person disobeys it then misfortune dogs him wherever goes. He suffers till he breaths his last.

In some conservative society dating is strictly prohibited. Here marriage, sex and issue are the chronological events. If anybody violates these sequences he acquires ill-fame. An unfortunate girl of such a patriarchal society is simply murdered by her family members in the name of so-called honour killing. Thus the girl dies and the family regains thereby protects its social chastity. Social stigma of an unmarried mother, of this orthodox society, corners the woman with much shame and immense hatred. Sometimes such a deserted mother commits suicide either killing or leaving her baby. Thus the orphan house becomes over crowded.

In the free sex society, there is no bondage or no chronological bar or barrier. As a result the orphan houses get regular supply of human babe. This is the outcome of fast living. This is the outcome of live together. The orphans, thus, are deprived form mothers' affection. They become prodigal and headache of the society thereby nation at large. Thus live together is not illegal, but it is immoral.

CONCLUSION:

History is the series of colourful events. They say history is written as per direction and dictation of the sweet will of the dictator. Thus it is fabricated or manufactured. As such, in history the names are real but facts either are fabricated or manufactured or both simultaneously. It is the store house of chronological events pregnant with immense colour and corruption as well.
